

DIABLO GRILL OWNER'S MANUAL

MODELS

SKU# 62648 LP (LIQUID PROPANE)

SKU# 62649 NG (NATURAL GAS)

DANGER

If you smell gas:

- Shut off gas to the appliance.
- Extinguish any open flame.
- Open lid.
- If odor continues, keep away from the appliance and immediately call your gas supplier or your fire department.

WARNING

- Do not store or use gasoline or other flammable liquids or vapors in the vicinity of this or any other appliance.
- An LP cylinder not connected for use shall not be stored in the vicinity of this or any other appliance.

READ THIS ENTIRE MANUAL CAREFULLY AND RETAIN FOR FUTURE REFERENCE.

BE SURE YOUR GRILL IS PROPERLY INSTALLED, ASSEMBLED AND CARED FOR. FAILURE TO FOLLOW THESE INSTRUCTIONS MAY RESULT IN SERIOUS BODILY INJURY AND/OR PROPERTY DAMAGE. IF YOU HAVE QUESTIONS CONCERNING ASSEMBLY OR OPERATION, CONSULT YOUR DEALER, GAS APPLIANCE SERVICE REPRESENTATIVE OR YOUR GAS COMPANY.

·NOTE TO INSTALLER: LEAVE THESE INSTRUCTIONS WITH THE CONSUMER AFTER INSTALLATION.

·NOTE TO THE CONSUMER: RETAIN THESE INSTRUCTIONS FOR FUTURE REFERENCE.

·THIS OUTDOOR COOKING GAS APPLIANCE IS NOT INTENDED TO BE INSTALLED IN OR ON RECREATIONAL VEHICLES AND/OR BOATS.

*FOR WARRANTY PURPOSES, PLEASE RECORD YOUR MODEL NUMBER, SERIAL NUMBER, DATE OF PURCHASE ON THE REGISTRATION CARD ON PAGE 3 ALONG WITH ATTACHING A COPY OF YOUR RECEIPT OR INVOICE TO PAGE 3

WARNING: THIS PRODUCT CAN EXPOSE YOU TO CHEMICALS INCLUDING CARBON MONOXIDE, WHICH IS KNOWN TO THE STATE OF CALIFORNIA TO CAUSE BIRTH DEFECTS OR OTHER REPRODUCTIVE HARM. FOR MORE INFORMATION VISIT www.P65Warnings.ca.gov

WARNING: Fuels used in gas or oil-fired appliances and the products of combustion of such fuels, contain chemicals known to the State of California to cause cancer, birth defects and/or reproductive harm. This warning is issued pursuant to California Health & Safety Code Sec. 25249.6.

REGISTERING YOUR GRILL

To validate your Bull Limited Warranty, you must submit the completed the Warranty Registration Card within 90 days from the date of purchase. Registration can be completed on-line at

https://bullbbq.ladesk.com/submit_ticket

or by sending the completed Warranty Registration Card and copy of your Purchase Receipt or Invoice as proof of purchase to:

BULL OUTDOOR PRODUCTS, INC.

1011 East Pine St.

Lodi, CA 95240

Attn: Warranty Service Center
(800) 521-2855

For Warranty Claims or Replacement Parts ordering, please fill out the area provided below:

PRODUCT INFORMATION REFERENCE CARD

• Model Number _____

• Serial Number _____

(The Serial Number is encoded with essential information for ordering replacement parts or submitting Warranty claims. Location of Serial Numbers is shown below)

• Date of Purchase _____

• Copy of your Purchase Receipt or Invoice.

For Warranty Questions call Customer Service at
(800) 521-2855

UN-PACKING YOUR NEW GRILL

Go to <https://bullbbq.com/bull-support-videos/> where we show you how to un-box the grill, install components and more.

SERIAL NUMBER LOCATIONS

HOW TO ORDER REPLACEMENT PARTS

This is where your Product Information Reference Card will come in handy for supplying necessary info needed by your Bull Authorized Dealer to assure you get the correct part(s) for your Grill or additional accessories to keep your Grill in top working condition. If you don't have the card, you can still get the model number and serial number on the inside of the left side panel. This information is required for parts orders.

Please refer to your owner's manual parts list and illustration to identify what you need.

To Order Replacement Parts on-line go to: <https://bullbbq.com/buy-parts>

Ordering Parts by phone:

Bull is ready to help with two regional suppliers.
open 8:00 am to 5:00 pm Monday through Friday.

For the Western Region, call (800) 258-6810

For the Eastern Region, call (800) 229-3056

INSPECT YOUR SIDE CART FOR ANY DAMAGE AND CONTACT OUR SERVICE CENTER OR LOCAL DEALER FOR REPLACEMENT OF ANY DAMAGED PARTS. IF DAMAGED DO NOT ATTEMPT INSTALLATION.

CAUTION: REGARDING CONVERTING YOUR GRILL FROM LIQUID PROPANE TO NATURAL GAS OR VICE-VERSA.

Your Grill's gas valve is pre-set at the factory specifically for the gas the Grill was intended for. That means a different or specific gas valve must be installed when converting from one type of gas to another. **Before you start**, be sure to contact your gas supplier or your Bull Grill Dealer. Conversion kits are sold only to professionals to perform conversion service. Failure to properly convert a unit can cause severe injury to yourself and/or others, irreparable damage to your grill and void of warranty.

WARNING: Use of any part that is not factory authorized will void your warranty and may be dangerous.

WARRANTY IS 1 YEAR FOR ALL PARTS			

WARNING: Use of any part that is not factory authorized will void your warranty and may be dangerous.

ROTISSERIE MOTOR MOUNTING BRACKET INSTALLATION

The Rotisserie Motor slides on to the bracket and is bolted to the flange on the outside of the grill. Use the first 2 mounting holes as shown to align the motor with slot on the grill lid that the spit goes through. The bracket can be installed on either side of the unit.

**REFER TO PAGE 21 FOR
OPERATING INSTRUCTIONS**

WARNING: Use of any part that is not factory authorized will void your warranty and may be dangerous.

SAFETY INSTRUCTIONS 
GRILL OPERATIONAL SAFETY

WARNING! FOR YOUR SAFETY, READ THE GUIDELINES BELOW FOR ASSEMBLY AND OPERATION OF YOUR GRILL

 **YOUR GAS GRILL IS ONLY FOR OUTDOOR USE.**

 **PROTECT CHILDREN: DO NOT ALLOW CHILDREN TO OPERATE GRILL. KEEP THEM AWAY FROM THE GRILL DURING USE, AND UNTIL THE GRILL HAS COOLED COMPLETELY.**

 **WARNING: DO NOT USE YOUR GAS GRILL UNDER EXTENDED AWNINGS, GARAGES, PORCHES, BREEZEWAYS, SHEDS OR OTHER ENCLOSED AREAS. FAILURE TO DO SO COULD RESULT IN A FIRE OR PERSONAL INJURY.**

 **DANGER: DO NOT PUT GRILL IN STORAGE OR TRAVEL MODE IMMEDIATELY AFTER USE. ALLOW GRILL TO COOL TO TOUCH BEFORE MOVING OR STORAGE. FAILURE TO DO SO COULD RESULT IN FIRE RESULTING IN PROPERTY DAMAGE, PERSONAL INJURY OR DEATH.**

ADDITIONAL SAFETY INSTRUCTIONS:

- 1) THIS GRILL IS NOT INTENDED FOR USE IN OR ON RECREATIONAL VEHICLES AND/OR BOATS.
- 2) DO NOT PLACE GRILL UNDER OR ON TOP OF AN SURFACE THAT WILL BURN.
- 3) DO NOT ALLOW OBSTRUCTION OR RESTRICTION TO THE FLOW OF COMBUSTION AND VENTILATION AIR AROUND GRILL HOUSING.
- 4) GRILL CLEARANCE FROM THE BACK AND SIDE OF ANY COMBUSTIBLE SURFACE MUST BE AT LEAST 21 INCHES. DO NOT STORE OR USE GASOLINE, OR OTHER LIQUIDS EMITTING FLAMMABLE VAPORS IN THE VICINITY OF GRILL OR ANY OTHER APPLIANCES.
- 5) DO NOT STORE EMPTY OR FULL SPARE LP GAS CYLINDERS AND/OR CHEMICALS UNDER OR NEAR GRILL OR ANY OTHER APPLIANCES.
- 6) KEEP THE FUEL HOSE AND ELECTRICAL CORDS AWAY FROM HOT SURFACES AND DRIPPING GREASE. CHECK AND CLEAN BURNER VENTURI TUBES FOR INSECTS AND DEBRIS. A CLOGGED TUBE CAN LEAD TO A FIRE BENEATH THE GRILL.
- 7) KEEP THE VENT OPENINGS OF THE CYLINDER ENCLOSURE FREE AND CLEAR FROM DEBRIS. CLEAN OUTDOOR COOKING GAS APPLIANCE WITH RECOMMENDED CLEANING AGENTS.
- 8) AVOID UNNECESSARY TWISTING OF THE HOSE. VISUALLY INSPECT THE HOSE PRIOR TO EACH USE FOR CUTS, CRACKS, EXCESSIVE WEAR OR OTHER DAMAGE AND REPLACE IF NECESSARY. THE REPLACEMENT HOSE SHOULD BE SPECIFIED BY THE MANUFACTURER.
- 9) NEVER LIGHT GRILL WITH LID CLOSED OR BEFORE CHECKING TO ENSURE BURNER TUBES ARE FULLY SEATED OVER GAS VALVE ORIFICES.
- 10) NEVER LEAN OVER COOKING SURFACE WHILE LIGHTING GRILL. USE BARBECUE TOOLS WITH WOOD HANDLES AND GOOD QUALITY INSULATED OVEN MITTS WHEN OPERATING GRILL.
- 11) NEVER PLACE OBJECTS OR UTENSILS ON TOP OF GRILL LID.

 **WARNING! FOR YOUR SAFETY...**

- 1) DO NOT STORE OR USE GASOLINE OR OTHER FLAMMABLE VAPORS AND LIQUIDS IN THE VICINITY OF THIS OR ANY OTHER APPLIANCE.
- 2) DO NOT STORE EMPTY OR FULL SPARE GAS CYLINDERS AND/OR CHEMICALS UNDER OR NEAR THIS OR ANY OTHER APPLIANCE.
- 3) KEEP THE FUEL HOSE AWAY FROM HOT SURFACES. PROTECT THE FUEL HOSE FROM DRIPPING GREASE. AVOID UNNECESSARY TWISTING OF THE HOSE. VISUALLY INSPECT THE HOSE PRIOR TO EACH USE FOR CUTS, CRACKS EXCESSIVE WEAR OR OTHER DAMAGE AND REPLACE IF NECESSARY.
- 4) NEVER TEST FOR GAS LEAKS WITH A LIGHTED MATCH OR OPEN FLAME.
- 5) NEVER LIGHT GRILL WITH LID CLOSED OR BEFORE CHECKING TO ENSURE BURNER TUBES ARE FULLY SEATED OVER GAS VALVE ORIFICES.
- 6) NEVER LEAN OVER COOKING SURFACE WHILE LIGHTING GRILL. USE BARBECUE TOOLS WITH WOOD HANDLES AND GOOD QUALITY INSULATED OVEN MITTS WHEN OPERATING GRILL.
- 7) KEEP ANY ELECTRICAL SUPPLY CORD AND THE FUEL SUPPLY HOSE AWAY FROM ANY HEATED SURFACES.

WARNING: IF THESE GUIDELINES ARE NOT FOLLOWED, FIRE CAUSING SERIOUS INJURY OR DEATH MAY OCCUR.

 SAFETY INSTRUCTIONS BEWARE OF CLOGGED BURNERS DUE TO SPIDER WEBS CAUTION: BURNERS MUST BE INSPECTED AND CLEANED BEFORE FIRST USE. Spiders and small insects occasionally spin webs or make nests in the burners during warehousing, transit and/or after long periods of non-use. These webs can lead to a gas flow obstruction, which could result in a fire in and around the burner venturi tubes. This type of fire is known as "FLASH-BACK" and can cause serious damage to your grill and create an unsafe operating condition for the user. Although an obstructed burner tube is not the only cause of "FLASH BACK" it is the most common cause, and frequent inspection and cleaning of the burners is necessary. WARNING NEVER cover grill slots, holes, or openings in the grill bottom, or cover an entire cooking grate with material such as aluminum foil. Doing so blocks air flow through the grill and may cause carbon monoxide poisoning. Aluminum foil linings may trap heat causing a fire hazard.	
--	---

DANGER! 'WHAT' TO DO IF YOU SMELL GAS...

- 1) SHUTOFF GAS TO THE APPLIANCE AS ITS SOURCE.
- 2) EXTINGUISH ANY OPEN FLAME
- 3) OPEN GRILL LID TO RELEASE ANY ACCUMULATION OF FUMES.
- 4) IF GAS ODORS PERSISTS, IMMEDIATELY CONTACT YOUR GAS SUPPLIER OR FIRE DEPARTMENT.

CHECKING FOR GAS LEAKS NEVER TEST FOR GAS LEAKS WHILE THE GRILL IS LIT!

It is a must that you follow the steps below to check for leaks on LP Gas Grills prior to first use or start of a new BBQ season and whenever the gas cylinder is changed on LP Gas Grills.

- 1) TURN OFF HEAT CONTROL VALVE(S), AND THEN TURN ON GAS AT SOURCE.
- 2) MAKE A SOAP SOLUTION BY MIXING ONE-PART LIQUID DETERGENT AND ONE-PART WATER.
- 3) APPLY THE SOAP SOLUTION TO ALL GAS CONNECTIONS. IF AIR BUBBLES APPEAR IN THE SOAP SOLUTION IT MEANS THE CONNECTIONS ARE NOT PROPERLY SEALED AND NEED TO BE TIGHTENED OR REPAIRED AS NEEDED. IF YOU HAVE A GAS LEAK THAT YOU CANNOT REPAIR, TURN OFF THE GAS AT THE SOURCE, DISCONNECT FUEL LINE FROM THE GRILL AND IMMEDIATELY CALL YOUR GRILL DEALER AND GAS SUPPLIER FOR PROFESSIONAL ASSISTANCE.

WARNING: IF THESE GUIDELINES ARE NOT FOLLOWED, FIRE CAUSING SERIOUS INJURY OR DEATH MAY OCCUR.

⚠ LIQUID PROPANE (LP) SAFETY GUIDELINES

YOUR PROPANE GAS GRILL IS DESIGNED TO OPERATE ON PROPANE GAS ONLY, AT A PRESSURE REGULATED AT 11" WATER COLUMN (W.C.) WHEN EQUIPPED WITH THE CORRECT PROPANE ORIFICES ON THE VALVES AND A PROPANE REGULATOR ON THE SUPPLY LINE REGULATED AT THE RESIDENTIAL METER. YOUR PROPANE GAS GRILL IS DESIGNED TO BE USED WITH A STANDARD 20 LB. GAS CYLINDER WITH SIZE OF 46CM (HEIGHT) / 18.1IN * 32CM (WIDTH) / 12.5IN. IN THE UNITED STATES, THE GAS CYLINDER MUST BE CONSTRUCTED AND MARKED IN ACCORDANCE WITH SPECIFICATIONS OF THE US DEPARTMENT OF TRANSPORTATION FOR PROPANE GAS CYLINDERS.

- 1) ALWAYS KEEP LP GAS CYLINDER SECURELY FASTENED IN AN UPRIGHT POSITION.
- 2) NEVER CONNECT AN UNREGULATED LP GAS CYLINDER TO THE GRILL.
- 3) DO NOT SUBJECT LP GAS CYLINDERS TO EXCESSIVE HEAT.
- 4) DO NOT STORE SPARE LP GAS CYLINDERS UNDER OR NEAR THIS APPLIANCE.
- 5) DO NOT FILL LP GAS CYLINDER BEYOND 80% FULL.

IF WARNING NOTICES 1 AND 2 ARE NOT FOLLOWED, A FIRE CAUSING SERIOUS INJURY OR DEATH MAY OCCUR

- 6) **CAUTION:** CHANGING THE GAS TANKS MUST BE DONE AWAY FROM ANY SOURCE OF IGNITION.
- 7) LP GAS TANK MUST BE MARKED IN ACCORDANCE WITH THE SPECIFICATIONS FOR LP GAS CYLINDERS, SPHERICAL TANKS AND TUBES FOR TRANSPORTATION OF DANGEROUS GOODS AND COMMISSION, CAN/CSA- B339, APPLICABLE
- 8) LP GAS TANK CONNECTION DEVICE IS COMPATIBLE WITH OUTDOOR COOKING APPLIANCES.
- 9) LP GAS TANK HAS APPROPRIATE VAPOR WITHDRAWAL.
- 10) LP GAS TANK MUST HAVE A LISTED OVERFILLING PREVENTION DEVICE.
- 11) LP GAS TANK MUST INCLUDE A COLLAR TO PROTECT THE CYLINDER VALVE.
- 12) LP GAS TANK USES A TYPE 1 TANK VALVE THAT IS FIRMLY SECURED IN AN UPRIGHT POSITION.
- 13) DO NOT USE AN LP CYLINDER THAT IS DAMAGED.
- 14) VISUALLY INSPECT THE LP HOSE PRIOR TO EACH USE FOR CUTS, CRACKS, EXCESSIVE WEAR OR DAMAGE. IF FOUND ASSEMBLY SHOULD BE REPLACED. USE ONLY THE BULL PART NUMBERS SHOWN IN THE PARTS LIST SUPPLIED WITH THIS UNIT. THE REPLACEMENT HOSE ASSEMBLY SHALL BE SPECIFIED BY THE MANUFACTURER.
- 15) LP GAS PRESSURE REGULATOR AND 31" INCH HOSE ASSEMBLY (BULL PART # 16589) ARE SUPPLIED AND MUST BE USED WITHOUT ALTERATION AND SHOULD ONLY BE USED ON THIS GRILL.
- 16) TO CONNECT TO LP TANK, ATTACH THE BLACK COUPLING NUT ON THE REGULATOR ASSEMBLY TO THE LP TANK BY ROTATING CLOCKWISE DIRECTION (SEE ILLUSTRATION BELOW) UNTIL IT IS COMPLETELY THREADED ONTO THE CYLINDER VALVE BEFORE TURNING GAS SUPPLY ON. TO REMOVE TURN THE BLACK COUPLING NUT OF THE HOSE AND REGULATOR ASSEMBLY IN A COUNTER- CLOCKWISE DIRECTION.

WARNING: IF THESE GUIDELINES ARE NOT FOLLOWED, FIRE CAUSING SERIOUS INJURY OR DEATH MAY OCCUR

LIQUID PROPANE (LP) SAFETY GUIDELINES (CONTINUED)

⚠ WHEN THE OUTDOOR COOKING GAS APPLIANCE IS NOT IN USE

WARNING: WHEN THE OUTDOOR COOKING GAS APPLIANCE IS NOT IN USE, THE GAS SUPPLY **MUST** BE TURNED OFF AT THE SUPPLY CYLINDER. THE STORAGE OF AN OUTDOOR COOKING GAS APPLIANCE INDOORS IS PERMISSIBLE ONLY IF THE CYLINDER IS DISCONNECTED AND REMOVED FROM THE OUTDOOR COOKING GAS APPLIANCE.

- 1) THE LP GAS MUST BE TURNED OFF AT THE SUPPLY CYLINDER.
- 2) DO NOT STORE SPARE LP GAS CYLINDERS UNDER OR NEAR THIS APPLIANCE.
- 3) SPARE LP GAS CYLINDERS MUST BE STORED OUTSIDE IN AN ADEQUATELY VENTILATED AREA THAT IS ISOLATED FROM THE GRILL.
- 4) SPARE LP GAS CYLINDERS MUST BE KEPT OUT OF REACH OF CHILDREN AND MUST NOT BE STORED IN A BUILDING, GARAGE OR ANY OTHER ENCLOSED AREA.
- 5) STORAGE OF AN OUTDOOR COOKING GAS APPLIANCE INDOORS IS PERMISSIBLE ONLY IF THE CYLINDER IS DISCONNECTED AND REMOVED FROM THE OUTDOOR COOKING GAS APPLIANCE
- 6) THE LP GAS CYLINDER MUST BE EQUIPPED WITH AN ARRANGEMENT FOR VAPOR WITHDRAWAL.
- 7) THE LP GAS CYLINDER MUST INCLUDE A COLLAR TO PROTECT THE CYLINDER VALVE.
- 8) PLACE DUST CAP ON CYLINDER VALVE OUTLET WHENEVER THE CYLINDER IS NOT IN USE. ONLY INSTALL THE TYPE OF DUST CAP ON THE CYLINDER VALVE OUTLET THAT IS PROVIDED WITH THE CYLINDER VALVE. OTHER TYPES OF CAPS OR PLUGS MAY RESULT IN LEAKAGE OF PROPANE.

WARNING: If the information in 1) and Clause 2) is not followed exactly, a fire causing death or serious injury may occur

LIQUID PROPANE GAS TO NATURAL GAS CONVERSION

Gas valves are pre-set at the Bull factory to operate on LP Gas or Natural Gas. If you wish to convert to a different gas type, other than LP or NG, be sure to contact your grill dealer, licensed plumber or authorized service center for further details. Conversion kits are not sold to the public and require a professional to perform service. Failure to properly convert a unit can cause serious injury to yourself and/or others, irreparable damage to your grill and void of warranty.

WARNING: IF THESE GUIDELINES ARE NOT FOLLOWED, FIRE CAUSING SERIOUS INJURY OR DEATH MAY OCCUR.

NATURAL GAS (NG) SAFETY GUIDELINES

Your Natural Gas (G20) grill is designed to use **NATURAL GAS ONLY**. The grill operates at a pressure of 4" water column (wc) or 10 mbar set at the natural gas regulator attached at the back of the grill. Prior to installing gas supply lines, check with your local gas utility or municipality regarding local gas pressure and for building code requirements and instructions or consult a licensed and knowledgeable installer.

NATURAL GAS PLUMBING TO CONNECTION SOURCE GUIDELINES

Refer to the following instructions and illustrations for typical gas supply connections.

We strongly suggest having your gas plumbing and connection to your grill be completed by a professional.

IMPORTANT:

Before connecting the grill to gas source, make sure BBQ Grill control knobs are in "OFF" position. Be sure to follow instructions for connecting an appliance to a fixed fuel piping system specifying the use of a rigid pipe, semi-rigid tubing, and/or a connector that complies with the Standard for Connectors for Outdoor Gas Appliances and Manufactured Homes, ANSI Z21.75 * CSA 6.27.

- 1) Install an "ON-OFF" shutoff valve for **OUTDOOR** gas supply source after gas line piping exits outside wall, or before gas piping enters ground.
- 2) Install an "ON-OFF" shutoff valve for **INDOOR** gas supply source to the branch fuel line in an accessible location near the supply line.
- 3) **Do not use** Teflon ® tape or pipe sealant on any flare ends because you will not obtain a leak-free seal.
- 4) Use **only** Pipe sealing compound or pipe thread tape of the type of resistant to the action of natural gas to at least the first three threads of all male pipe threads when making the connection.
- 5) Disconnect your gas grill from fuel source when the gas supply is being tested at high pressures. This appliance must be disconnected from the gas supply piping system during any pressure testing of that system at pressures more than 0.5 psi (3.5 kPa). The outdoor cooking gas appliance and its individual shut-off valve must be disconnected from the gas supply piping system during any pressure testing of that system at test pressures more than 0.5 psi (3.5 kPa). The outdoor cooking gas appliance must be isolated from the gas supply piping system by closing its individual manual shut-off valve during any pressure testing of the gas supply piping system at test pressures equal to or less than 1/2 psi (3.5 kPa).

- 6) **Turn off your gas grill when the gas supply is being tested at low pressures. This appliance must be isolated from the gas supply piping system by closing its individual valve.**

NATURAL GAS CONNECTION TO GRILL

IMPORTANT: Bull Outdoor Products does not recommend the use of any quick connect fittings or lines to the unit. Use of these types of fittings or lines could cause low gas flow and greatly reduce the performance of the unit.

- 1) Do not use Teflon ® tape or pipe sealant on any flare ends because you will not obtain a leak-free seal
- 2) Remove plastic cap from regulator installed on grill.
- 3) Attach stainless steel flex line 3/8" flare-female end to the regulator.

- 4) Attach the other end of flex line to shut-off valve through a nipple.
- 5) Attach a shut-off valve to gas supply pipe.

TO PERFORM GAS LEAK CHECK – REFER TO PAGE 8 OR 17

THE LOCATION AND INSTALLATION OF YOUR GRILL

PLEASE READ THESE INSTRUCTIONS BEFORE INSTALLING YOUR GRILL

Your Built-in Gas Grill comes to you fully assembled. We strongly recommend professional installation and hook up of the Gas BBQ grill. These instructions will provide you with the measurements necessary for you or your builder to construct a masonry structure for your outdoor gas grill.

- 1) This gas grill must be installed in accordance with local codes or, if in an area without local codes, with the latest edition of the National Fuel Gas Code ANSI Z223.1. In Canada, installation must conform to the standard CAN/ CGA 1-b149.1 and/or (Installation Code for Gas Burning Appliances and Equipment) and any local codes.
- 2) The outdoor cooking gas appliance, when installed, must be electrically grounded in accordance with local codes or, in the absence of local codes, with the National Electrical Code, ANSI/NFPA 70, or the Canadian Electrical Code, Part I, CSA C22.1.
 - a) To protect against electric shock, do not immerse cord or plugs in water or other liquid.
 - b) Unplug from the outlet when not in use and before cleaning. Allow it to cool before putting on or taking off part.
 - c) Do not operate any outdoor cooking gas appliance with a damaged cord, plug, or after the appliance malfunctions or has been damaged in any manner. Contact the manufacturer for repair.
 - d) Do not let the cord hang over the edge of a table or touch hot surfaces.
 - e) Do not use an outdoor cooking gas appliance for purposes other than intended.
 - f) When connecting, first connect plug to the outdoor cooking gas appliance then plug appliance into the outlet.
 - g) Use only a Ground Fault Interrupter (GFI) protected circuit with this outdoor cooking gas appliance
 - h) Never remove the grounding plug or use with an adapter of 2 prongs and
 - i) Use only extension cords with a 3-prong grounding plug, rated for the power of the equipment, and approved for outdoor use with a W-A marking.
- 3) **DO NOT** use your gas grill in garages, porches, breezeways, sheds, or other enclosed areas.
- 4) Your gas grill is to be used **OUTDOORS ONLY**, with at least 21 inches clearance from the back and side of any combustible surface.
- 5) The grill should not be placed under or on top of any surface that will burn.
- 6) **Do not** obstruct the flow of combustion and ventilation air around the grill housing.

NOTES TO INSTALLER:

- 1) Leave these instructions with the consumer for future reference.
- 2) The grill must be installed in accordance with all local building codes.
- 3) Do not use any combustible materials for this construction.
- 4) We do not endorse the use of combustible materials for the floor of the kitchen.
- 5) The minimum horizontal clearance to adjacent combustible surface from side and back of the grill must be **21 inches**.
- 6) Provide 6 inches of clearance behind grill to allow front portion of hood to open and for ventilation purposes.
- 7) Please remove the cotter pins from the burners before installing the unit into an island. See page 12 for cotter pin removal.

GRILL OVERHEAD VENTILATION INSTRUCTIONS

⚠ IMPORTANT!

DO **NOT** USE OR INSTALL YOUR GRILL IN THE FOLLOWING LOCATIONS:

- INDOORS
- ENCLOSED AREAS
- BREEZEWAYS
- SCREENED-IN PATIOS
- INSIDE A BUILDING

IF THE GRILL LOCATION HAS OVERHEAD CONSTRUCTION PRESENT YOU **MUST** FOLLOW THESE INSTRUCTIONS:

- 1) DO NOT INSTALL GRILL UNDER A COMBUSTIBLE COVER.
- 2) OVERHEAD CONSTRUCTION ABOVE COOKING SURFACES **MUST** BE NON-COMBUSTIBLE AND **MUST** BE BUILT NO LESS THAN 60 INCHES ABOVE THE COOKING SURFACES UNLESS OTHERWISE STATED BY LOCAL BUILDING AND FIRE CODE REQUIREMENTS.
- 3) A VENTILATION HOOD **MUST** BE INSTALLED ABOVE THE COOKING SURFACE WITH A 30 INCHES MINIMUM CLEARANCE BETWEEN VENTILATION HOOD AND COOKING SURFACE
- 4) VENTILATION HOOD **MUST** BE LARGER THEN THE COOKING SURFACE WITH A MINIMUM OF 3 INCHES OF OVERLAP ON EACH SIDE OF COOKING SURFACE
- 5) VENTILATION HOOD **MUST** BE RATED WITH A MINIMUM OF 1200 CFM (CUBIC FEET PER MINUTE) FOR PROPER APPLICATION.

WARNING: IF THESE GUIDELINES ARE NOT FOLLOWED, FIRE CAUSING SERIOUS INJURY OR DEATH MAY OCCUR

GRILL VENTILATION INSTRUCTIONS WHEN USING BUILT-IN CABINETS

! IMPORTANT!

- 1) Upper and lower-level vents must be provided for combustion air on both sides of the built-in cabinet.
- 2) Vents on BBQ insert must remain unobstructed to allow for combustion air and ventilation.
- 3) Upper vents must be located within 5 inches from the top of the island enclosure to the bottom of the vent.
- 4) Lower vents must be located within 1 inch from the bottom of the island enclosure to the bottom of the first vent openings and no more than 5 inches from the bottom of the island enclosure to the top of the vent.
- 5) If not using Bull vents. The vents you use must meet ANSI Standard codes.
- 6) The upper vents must have openings that have a total free area of not less than 1 sq. in per lb. of stored fuel capacity per vent and the lower vents must have openings that have a total free area of not less than 1/2 sq. in per lb. of stored fuel capacity per vent.
- 7) Both upper and lower vent openings must have minimum dimensions to permit the entrance of a 1/8 in diameter rod.
- 8) Vents must be provided for combustion air and ventilation on both sides of built-in cabinet.
- 9) When choosing a location for your gas grill keep in mind that it should never be located under any overhead combustible construction.
- 10) Per illustration, the sides and back of the grill should not be any closer than **21 inches** to combustible construction.
- 11) **Per CSA, it is required that any built-in cabinet must have enough room for only 1 LP tank. The LP tank enclosure must not exceed (24.5" X 24.5" X 30") and there must be a minimum clearance of 2 inches between the floor and the propane tank enclosure.**

(DO NOT STORE EMPTY OR FULL SPARE TANKS UNDER OR NEAR THIS OR ANY OTHER APPLIANCE)

- 12) There must be a minimum of 6 inches counter space behind the grill to allow the grill hood to clear properly.
- 13) The cylinder valve on the LP tank must be readily accessible for hand operation.
- 14) The LP tank must be isolated enough to where it is shielded from radiant heat and open flames.
- 15) The LP tank must be protected from foreign matter such as hot drippings.
- 16) There must be access so the LP tank can be connected, disconnected, inspected and leak tested outside of the cabinet.
- 17) The enclosure must provide access to allow leak testing of LP connections inside the enclosure for the LP Tank
- 18) The connectors must comply with ANSI Z21.75 CSA 6.27 standard for Connectors used on Outdoor Gas Appliances and Manufactured Homes to be suitable for outside installation.
- 19) The instructions shall indicate that the maximum length of the connection shall be 6 ft.
- 20) Please ensure visibility of the connector and directions for the piping, flexible tubing and gas connector within enclosure.
- 21) Do not use any combustible materials for this construction.

GRILL & VENT INSTALLATION DETAILS (DIMENSIONS ARE IN INCHES)

WARNING: IF THESE GUIDELINES ARE NOT FOLLOWED, FIRE CAUSING SERIOUS INJURY OR DEATH MAY OCCUR

LIQUID PROPANE GRILL INSTALLATION SPECIFICATIONS **IMPORTANT!**

- 1) Vents must be provided for combustion air and ventilation on both sides of built-in cabinet.
 - 2) When choosing a location for your gas grill keep in mind that it should never be located under any overhead combustible construction.
 - 3) The sides and back of the grill should not be any closer than **21 inches** to combustible construction.
 - 4) Per CSA, it is required that any built-in cabinet must have enough room for only 1 LP tank. The LP tank enclosure must not exceed (24.5" X 24.5" X 30") and there must be a minimum clearance of 2 inches between the floor and the and the propane tank enclosure.
- (DO NOT store empty or full spare tanks under or near this or any other appliance.)
- 5) There must be a minimum of 6" counter space behind the grill to allow the grill hood to clear properly.
 - 6) The cylinder valve on the LP tank must be readily accessible for hand operation. The tank must be isolated enough to where it is shielded from radiation, open flames and protected from foreign matter such as hot drippings.
 - 7) There must be access so the tank can be connected, disconnected, inspected and leak tested outside of the cabinet. As well as access so that connections which could be disturbed when installing the tank in the cabinet can be leak tested inside the cabinet.
 - 8) The connector must comply with the Standard for Connectors for Outdoor Gas Appliances and Manufactured Homes, ANSI Z21.75 • CSA 6.27, and suitable for outside installation. The instructions shall indicate that the maximum length of the connection shall be 6 ft. Please ensure visibility of the connector and directions for supporting the piping, flexible tubing, or gas connector within the built-in enclosure.
 - 9) The LP gas supply cylinder(s) to be used must be constructed and marked in accordance with the Specifications for LP gas Cylinders of the U.S. Department of Transportation (D.O.T.) or the Standard for Cylinders, Spheres and Tubes for Transportation of Dangerous Goods and Commission, CAN/CSAB339, as applicable; and provided with a listed overfilling prevention device. And provided with a cylinder connection device compatible with the connection for outdoor cooking appliances.

REFER TO PAGES 8 OR 17 FOR LEAK CHECK INSTRUCTIONS

WARNING: Use of any part that is not factory authorized will void your warranty and may be dangerous.

LP GAS TANK RETENTION GUIDELINES

NOTE: AN LP TANK (CYLINDER) WITHIN AN ENCLOSURE MUST USE A TANK RETENTION SYSTEM TO PREVENT BEING KNOCKED OVER.

Below are the requirements with supportive illustrations for an LP Tank enclosure and how to install a Tank Retention System which can be obtained through your Bull Dealer:

Per CSA the following is required that any built-in cabinet must have enough room for only 1 LP tank. The LP tank enclosure must not exceed (24.5" X 24.5" X 30") and there must be a minimum clearance of 2 inches between the floor and the propane tank enclosure.

Any Tank Retention system must be securely fastened to the island floor using bolts with washers and nuts. There must be a minimum clearance of 2 inches between the floor and the cylinder enclosure. Once secured, place the LP tank in the tank retention system and tighten the tank retention bolts clockwise until the tank is held snug and cannot move. Turn the retention bolt counter clockwise to free the tank for removal.

WARNING:

- DO NOT STORE AN EMPTY, SPARE OR DISCONNECTED LP GAS CYLINDER UNDER OR NEAR THIS GRILL OR ANY OTHER APPLIANCE.
- DO NOT USE A DENTED OR RUSTY LP GAS CYLINDER AS THIS MAY BE HAZARDOUS.

WARNING: IF THESE GUIDELINES ARE NOT FOLLOWED, FIRE CAUSING SERIOUS INJURY OR DEATH MAY OCCUR

NATURAL GAS GRILL INSTALLATION SPECIFICATIONS

Refer to the following instructions and illustrations for typical gas supply connections.

We strongly suggest professional installation of your gas plumbing and connection to your grill.

IMPORTANT: Before connecting the grill to gas source, make sure grill control knobs are in "OFF" position.

Be sure to follow instructions for connecting an appliance to a fixed fuel piping system specifying the use of a rigid pipe, semi-rigid tubing, and/or a connector that complies with the Standard for Connectors for Outdoor Gas Appliances and Manufactured Homes, ANSI Z21.75 For post-mounted outdoor cooking gas appliances, in-ground metallic posts shall be protected against corrosion as warranted by soil conditions. A suitable coating of corrosion protection will retard the effects of corrosion and help your Bull purchase last longer.

IMPORTANT INSTALLATION GUIDELINES:

- 1) Vents must be provided for combustion air and ventilation on both sides of the built-in cabinet.
- 2) When choosing a location for your gas grill, keep in mind that it should never be located under any overhead combustible construction.
- 3) The sides and back of the grill should not be any closer than **21 inches** to combustible construction as shown in drawing below.
- 4) There must be a minimum of **6 inches** of counter space behind the grill to allow grill hood to clear properly.
- 5) Do not use any combustible materials for this construction.
- 6) Do not store empty or full spare gas tanks under or near this or any other appliance.

NATURAL GAS CONNECTION TO GRILL

IMPORTANT: Bull Outdoor Products does not recommend the use of any quick connect fittings or lines to the unit. The use of these types of fittings or lines could cause low gas flow and reduce the performance of the unit.

- 1) Do not use Teflon ® tape or pipe sealant on any flare ends because you will not obtain a leak-free seal.
- 2) Remove plastic cap from regulator installed on grill.
- 3) Attach stainless steel flex line 3/8" flare-female end to the regulator.
- 4) Attach the other end of flex line to shut-off valve through a nipple.
- 5) Attach a shut-off valve to gas supply pipe.

REFER TO PAGES 8 OR 17 FOR LEAK CHECK INSTRUCTIONS

NG SUPPLY LINE DETAILS

WARNING: IF THESE GUIDELINES ARE NOT FOLLOWED, FIRE CAUSING SERIOUS INJURY OR DEATH MAY OCCUR

LIGHT SYSTEM TRANSFORMER INSTALLATION

NOTE: Per illustration below, the transformer must be installed at least 6 inches above the ground to ensure transformer and interior light system longevity. The transformer has mounting holes so you can fasten to the frame inside your island or grill enclosure.

Since we do not know what material, you'll be mounting to you'll need to provide your own fasteners to complete.

WARNING: Use of any part that is not factory authorized will void your warranty and may be dangerous.

GRILL 'FIRST USE' LIGHTING PROCEDURE

- DO NOT SMOKE WHILE LIGHTING GRILL OR CHECKING GAS SUPPLY
- CONNECTIONS BECOME FAMILIAR WITH THE SAFETY GUIDELINES AT THE FRONT OF THE MANUAL
- DO NOT LEAVE GRILL UNATTENDED DURING USE
- DO NOT MOVE GRILL DURING USE
- TURN OFF GAS SUPPLY AFTER USING GRILL
- IT IS RECOMMENDED YOU USE PROTECTIVE GLOVES TO OPERATE THE GRILL WHEN HANDLING ANY COMPONENTS WITH TRANSFERRED HEAT TEMPERATURE.

IMPORTANT! FOLLOW THE STEPS BELOW BEFORE FIRST USE OR AT START OF NEW GRILLING SEASON

- 1) If your grill fuel source is LP, check the gas cylinder to see if it's full.
- 2) Check that the end of each burner tube is properly located over each valve orifice.
- 3) Wash flame tamers, cooking grids, and warming rack with warm, soapy water.
- 4) Rinse and dry thoroughly.
- 5) Season metal surfaces with cooking oil and occasionally throughout the season.
- 6) PERFORM LEAK TEST PER instructions below to ensure that there are no gas leaks before first use, after changing gas tank or start of a new grilling season.
- 7) After cooking is completed, turn grill to high setting for NO MORE THAN five minutes to burn off excess grease or food residue.

LEAK CHECK INSTRUCTIONS

- 1) Turn off heat control valve(s), and then turn on gas at source.
- 2) Make a soap solution by mixing one-part liquid detergent and one-part water.
- 3) Apply the soap solution to all gas connections: bubbles will appear in the soap solution if connections are not properly sealed. Tighten or repair as necessary.
- 4) If you have a gas leak that you cannot repair, turn off the gas at the source, disconnect fuel line from the grill and immediately call your grill dealer and gas supplier for professional assistance.
- 5) Make sure all gas connections are securely tightened.

FIRST USE OR FIRST USE 'BURN OFF' GUIDELINES:

Always open lid before lighting. Do not move the appliance when it is in use.

NOTE: The gas lines and burners will be full of air after assembly or installation. Before lighting, please follow the steps below to purge the gas lines and prime them with gas to properly ignite the burners on your grill. It may require several attempts at lighting the burners before you are successful.

- 1) With BBQ Grill control knobs in "OFF" position, turn on the Gas supply.
- 2) Light any burner by pushing its control knob in fully and slowly (3 to 4 seconds) turning it about 1/4 turn to the left (counterclockwise) until a click is heard. The 3 to 4 second duration should provide enough gas to light the burner. If the burner does not light, immediately return the control knob to "OFF", wait several minutes for the gas to disperse, and repeat the process. After burner lights successfully, turn control knob to "OFF".
- 3) Repeat process for each control knob/igniter, in turn, ensuring that other knobs are in "OFF" position as you perform each check.
- 4) You'll need to perform a 'burn off' to the grill to get rid of any odors or foreign matter by igniting the burners, closing the lid, and operating at "HIGH" setting for about five minutes. **NOTE:** Seasoning your grill is optional if you do use with cooking oil.
- 5) If any burners fail to light after several attempts, discontinue gas supply at source and re-inspect for obstructions to gas flow and orifices.

NOTE: TO LIGHT INFRARED BURNER, TURN KNOB AND WAIT ABOUT 10 SECONDS TO ALLOW GAS TO GET TO BURNER BEFORE CLICKING IGNITION KNOB.

ALWAYS LIGHT THE GRILL WITH THE LID IN AN OPEN POSITION!

WARNING: IF THESE GUIDELINES ARE NOT FOLLOWED, FIRE CAUSING SERIOUS INJURY OR DEATH MAY OCCUR.

GRILL STANDARD LIGHTING PROCEDURE

Set ALL BBQ Grill control knobs to "OFF" and open gas supply, LP cylinder or Natural Gas Valve.

LIGHTING MAIN BURNER(S):

- 1) Become familiar with the safety guidelines at the front of the manual.
- 2) If your grill fuel source is a LP gas cylinder, check to see that cylinder is filled.
- 3) Check that the end of each burner tube is properly located over each valve orifice.
- 4) Make sure all gas connections are securely tightened.

TEST FOR LEAKS WITH A SOAP SOLUTION, NEVER WITH A FLAME.

TO PERFORM GAS LEAK CHECK – REFER TO PAGE 8 or 17

5) Always open lid before lighting.

6) Set ALL BBQ Grill control knobs to "OFF" and open gas supply, LP cylinder or at Natural Gas Valve.

7) Ignite only the burners you intend to use, using the same method for each: Push in control knob completely and rotate slowly (3 to 4 seconds) about 1/4 turn to the left counter clockwise until a click is heard. The 3 to 4 second duration should provide enough gas to light the burner. If the burner does not light, immediately return the control knob to 'OFF', wait several minutes for the gas to disperse, and repeat the process. After burner ignites, repeat procedure with any other burner needed.

8) Adjust control knob(s) to desired cooking temperature.

NOTE: Initially, the Burner will have a blue flame (see illustration guideline below). After some time, the color of the flame will be orange.

If the burner does not light after several attempts, immediately (or within 5 seconds?) return the control knob to 'OFF', wait 5 minutes for the gas to disperse before repeating the process or attempting to manually light the grill per instructions shown below.

NOTE: Flame color may not be evident in bright daylight.

9) **NOTE:** If igniters fail to produce a spark at the electrode tip, burners can be manually lit with a fireplace-type match. See next page for instructions.

WARNING: IF THESE GUIDELINES ARE NOT FOLLOWED, FIRE CAUSING SERIOUS INJURY OR DEATH MAY OCCUR.

TO LIGHT GRILL WITH A FIREPLACE-TYPE MATCH

NOTE: To light gas grill with a fireplace-type match.

- 1) Use provided Lighting Rod to hold a lighted fireplace type match or long-necked butane lighter placing flame near to burner ports.
- 2) Push in control knob completely and rotate slowly (3 to 4 seconds) about 1/4 turn to the left counter clockwise until a click is heard. The 3 to 4 second duration should supply enough gas to light the burner. If the burner does not light, immediately return the control knob to 'OFF' position, and wait several minutes for the gas to disperse, and repeat the process.
- 3) Turn off burners that are not needed and adjust other burners to desired cooking temperature.

The provided Lighting Rod is for holding a fireplace match to light the grill. Is located inside the front of the grease tray as shown below.

INFRARED "BACK BURNER" The rear Infrared Back Burner allows for slow rotisserie cooking of meats and poultry. Infrared burners radiate heat onto the outer surface of the food. This allows cooking without the grease drippings burning on the flame tamers

INFRARED "BACK BURNER" SAFETY GUIDELINES

WARNING: ALWAYS LIGHT THE GRILL WITH THE HOOD IN AN OPEN POSITION!

- THE 'BACK BURNER CONTROL KNOB HAS A FIXED SETTING AND IS NOT ADJUSTABLE. DO NOT ATTEMPT TO REGULATE THE BACK BURNER BY USING THE CONTROL KNOB.
- NEVER OPERATE ROTISSERIE BURNER WITH MAIN BURNER(S) "ON"
- WARMING RACK MUST BE REMOVED WHEN OPERATING THE ROTISSERIE BURNER

INFRARED "BACK BURNER" LIGHTING INSTRUCTIONS:

- 1) Set ALL BBQ Grill control knobs to "OFF" and open gas supply, LP cylinder or Natural Gas Valve.
- 2) The Back Burner is the smaller control knob is found at the middle of the Control Panel. Push in control knob completely and rotate slowly (5 to 10 seconds) about 1/4 turn to the left counter clockwise until a click is heard. The 5 to 10 second duration should provide enough gas to light the burner. If the burner does not light, immediately return the control knob to "OFF", wait several minutes for any accumulated gas to clear out of the grill.
- 3) After lighting, keep lid closed and operate 'Back Burner' at the "ON" position when using rotisserie.

TO LIGHT INFRARED BURNER WITH A FIREPLACE-TYPE MATCH

1) Follow steps 1 & 2 above. Carefully insert lighted fireplace-type match or long-necked butane lighter placing flame near to the Ceramic Panel. Press in control knob and rotate left counter clockwise to "HIGH" or "ON" setting to release gas. Burner should light immediately. After lighting keep lid closed when using rotisserie.

2) **NOTE:** Rotisserie burner may take a few attempts to ignite.

WARNING: IF THESE GUIDELINES ARE NOT FOLLOWED, FIRE CAUSING SERIOUS INJURY OR DEATH MAY OCCUR.

COOKING COMPONENT INSTALLATION, CAUTION, BEFORE YOU START:

- 1) Turn off the gas supply at the gas supply source first
- 2) It is recommended you use protective gloves while operating the grill or when handling any components with transferred heat temperature.
- 3) Do not move the grill during use.
- 4) Check gas valve orifices, burner tubes and burner ports for any obstructions

PER DRAWING BELOW:

- 5) Place stainless steel heat shields on lowest ledge under / between burners in grill insert.
- 6) Place stainless steel flame tamers on lower ledge above burners in grill insert.
- 7) Place cooking grates in grill insert on ledge above flame tamers.
- 8) Please read Safety, Lighting and Operating Instructions carefully.

For more help installing components, go to <https://bullbq.com/bull-support-videos/>

NOW YOUR GAS GRILL IS READY TO USE!

ANY MODIFICATION OF THE APPLIANCE MAY BE DANGEROUS TO YOU OR OTHERS AND MAY VOID PRODUCT WARRANTY

COOKING TEMPERATURE SETTINGS

HIGH SETTING Use this setting only for fast warm-up, for searing steaks and chops, and for burning food residue from the cooking grids after the cookout is over.

MEDIUM SETTING Use this setting for most grilling, roasting or baking, and for cooking hamburgers and vegetables.

LOW SETTING Use this setting for all smoke cooking, rotisserie cooking, and when cooking very lean cuts such as fish.

NOTE: These temperatures vary with the outside temperature and the amount of wind.

PRE-HEATING: It is necessary to preheat the grill briefly before cooking certain foods, depending on the type of food and the cooking temperature. Food that requires a high cooking temperature will need to preheat for five minutes; food that requires a lower cooking temperature needs only a period of two to three minutes. There is no need to preheat for casseroles or other foods that require slow cooking.

COOKING METHODS

You can cook poultry and large cuts of meat slowly to perfection on one side of the grill by indirect heat from the next burner or with infrared rotisserie burner. The heat from the lighted burner circulates gently throughout the grill, cooking the meat or poultry without any direct flame beneath or below the food you are preparing. This method reduces flare-ups when cooking extra fatty cuts, because there is no direct flame to ignite the fats and juices that drip down during cooking. Place a drip pan slightly smaller than the cut of meat on the cooking grids or flame tamer surface under the meat. This will allow you to catch meat juices for making gravy.

FLARE-UPS:

The fats and juices that drip from the meat cause flare-ups. Since flare-ups impart the distinctive taste and color to food cooked over an open flame, they should be expected and encouraged within reason.

CAUTION: Uncontrolled flaring can result in a ruined meal. To control excessive flare-ups caused by too high a heat setting, turn the heat control knob to a lower setting.

CAUTION: If burners go out during operation, close gas supply at source, and turn all gas valves off. Open lid and wait five minutes before trying to re-light (this allows accumulated gas fumes to clear).

CAUTION: Should a grease fire occur, close gas supply at source, turn off all burners and leave lid closed until fire is out. Do not use water or any liquid to extinguish a grease fire.

CAUTION: Do not attempt to disconnect any gas fitting while your barbecue is in operation or while gas feed is on.

ROTISSERIE SYSTEM INSTALLATION TO GRILL

- 1) The trolley thumb screw should be located on the inside of the grill, screw the knurled nut on next, next add the counterweight followed by screw on the black handle.
- 2) SETTING THE COUNTERWEIGHT, the purpose of the counterweight is to balance the rotation and prevent lopsided movement of the motor. To adjust the counterweight, loosen the black handle and slide the counterweight up or down to properly position the weight of the food.
- 3) ROTISSERIE SYSTEM OPERATION

NOTE: FOLLOWING THE GUIDELINES BELOW WILL PREVENT STRAINING YOUR ROTISSERIE SPIT ROD AND MOTOR

- 1) DO NOT EXCEED 20 lb. MAX WEIGHT CAPACITY
- 2) THE ITEM YOUR PREPARING NEEDS TO BE PLACED IN A BALANCED POSITION ON THE ROTISSERIE SPIT ROD.
- 3) BEFORE LIGHTING THE INFRARED BURNER CHECK TO MAKE SURE THE MEAT DOES NOT HIT THE INFRARED BURNER WHILE TURNING.
- 4) BEFORE LIGHTING THE INFRARED BURNER CHECK TO MAKE SURE THE MEAT DOES NOT HIT THE INFRARED BURNER WHILE TURNING.

WARNING:

- NEVER OPERATE ROTISSERIE BURNER WITH MAIN BURNER(S) "ON"
- WARMING RACK MUST BE REMOVED WHEN OPERATING THE ROTISSERIE BURNER

ALWAYS LIGHT THE GRILL WITH THE HOOD IN AN OPEN POSITION!

ROTISSERIE COOKING OPTIONS

Rotisserie is a great method for cooking meat or poultry pieces slowly and evenly. The constant turning provides a self-basting action, making food cooked on a rotisserie exceptionally moist and juicy. Rotisserie cooking requires 1 ½ to 4½ hrs. usually depending on the size and type of meat being cooked.

ROTISSERIE COOKING WITH INDIRECT HEAT

Indirect heat can be used cooking on a rotisserie but remember to use foil or an aluminium drip pan is to prevent excessive flare-ups. Before you start, remove the cooking grates to allow use of a basting pan under the rotisserie area on top of the flame tamer(s) to catch the drippings. Lastly, rotate the meat on the spit rod to make sure it clears everything.

BURNER REMOVAL INSTRUCTIONS

Your grill has 6 burners that have cotter pins to keep the burners in place during shipping. You'll need to remove the cotter pins to allow burner removal for inspection and or cleaning. The cotter pins can be discarded or kept in case the grill is relocated. If your grill has the gas supply already installed, please follow these safety instructions.

SAFETY INSTRUCTIONS PRIOR TO REMOVAL OF BURNERS:

Always follow these instructions below prior to burner removal.

NOTE: TO REDUCE THE CHANCE OF FLASHBACK, THE PROCEDURES BELOW SHOULD BE FOLLOWED

- 1) Do not attempt burner removal during or right after use. Allow Grill to cool long enough to touch inside.
- 2) Always turn off the gas supply prior to cleaning your grill.
- 3) Gas control knobs should be in the "OFF" position.
- 4) Fuel line should be disconnected from the gas valve manifold.

(Cotter Pin Removal)

These items should be removed first. →

- 1) Cotter Pin Location, go to the back side of the grill and look underneath inside of the back panel at the spot where you pulled the out the grease tray. That is where the cotter pins are located to secure the cast burners to the grill during transit. There you will see the a peg at the end of each cast burner protruding through the grill wall and secured with a cotter pin.
- 2) Cotter Pin Removal, Below on the left shows how the cotter pin is removed from the standard burners. The cotter pins can be removed with a set of pliers. There is no need to replace the cotter pins, they are for shipping purposes only.

You can also refer to our video for help at

<https://bullbbq.com/video/how-remove-cotter-pins-bull-grill>

Each burner is held to the grill by a cotter pin. The detail below shows how to remove the cotter pin.

Detail view showing cotter pin pulled from peg to release burner from grill.

REMOVING THE BURNERS FROM YOUR GRILL (CONTINUED)

To remove burners, remove cotter pin and lift the burner out of the retaining hole enough to clear so you slide the burner free from the gas valve tip as shown. To re-install burners, install burner back on gas valve tip far enough to allow the burner retainer post to

MONTHLY BURNER INSPECTION INSTRUCTIONS:

After removal do the following:

- 1) First check the following areas shown below to verify they are damage free and clear of debris.
- 2) Monthly inspection of the burners for damage (cracks or holes) or any openings caused by corrosion. If you find damage, order and install a new burner.
- 3) After installation, check to ensure the gas valve orifices are correctly inside the ends of burner tubes.

BURNER SHUTTER CLIP INSPECTION / ADJUSTMENT

The burners are set to a factory setting; however, the air to fuel mixture may need to be adjusted to accommodate different gas pressures. To adjust the air to fuel mixture, loosen the screw and rotate the shutter clip to the appropriate setting (see illustration on right). Tighten the screw and repeat adjustment procedure to the remaining burners. This should improve burner efficiency.

BURNER CLEANING INSTRUCTIONS:

- 1) Wire brush entire outer surface of burner to remove food residue, dirt or loose corrosion.
- 2) Bend a stiff wire (a light-weight coat hanger works well) into a small hook as shown. Run the hook through each burner tube several times until clear.

- 3) Use a narrow bottlebrush with a flexible handle. Run the hook through each burner tube and burner several times.
- 4) Wire brush entire outside surface of burner to remove loose corrosion.
- 5) Clean any clogged hole with a stiff wire (such as an open paper clip).
- 6) Inspect the burner assembly for any openings caused by corrosion.

INSTALLING BURNERS BACK IN GRILL

Note, there is no need to use the cotter pin while installing the back into position. It is for shipping purposes only.

IMPORTANT NOTE Check the burner to make sure it is properly located after replacing.

Make sure the valve orifices are inside the burner tubes (see illustration below).

WARNING If the valve orifices do not fit inside the burner tubes, lighting the burners may cause an explosion and/or fire.

CORRECT POSITION

INCORRECT POSITION
NOTE GAP BETWEEN
BURNER TUBE
AND BURNER ORIFICE

BURNER IGNITOR / ELECTRODE INSPECTION

With all control knobs set to "OFF", in turn, push each control knob in fully and turn slowly about a 1/4 turn to the left (counter clockwise) until a click is heard and you should see a blue spark at the electrode tip. If you do not see a spark, refer to page 22 for troubleshooting. Return control knob to "OFF" before checking next igniter.

BURNER OPERATION CHECK

- 1) With BBQ Grill control knobs in "OFF" position, turn on the Gas supply.
- 2) Light any burner by pushing its control in fully and slowly (3 to 4 seconds) turn about 1/4 turn to the left (counter clockwise) until a click is heard. The 3 to 4 second duration should provide enough gas to light the burner. If the burner does not light, immediately return the control knob to "OFF", wait several minutes for the gas to disperse, and repeat the process. After burner lights successfully, turn control knob to "OFF".
- 3) Repeat process for each control knob/igniter, in turn, ensuring that other knobs are in "OFF" position as you perform each check.

If any burners fail to light after several attempts, discontinue gas supply at source and re-inspect for obstructions to gas flow and orifices.

GRILL LIGHTING SYSTEM
LIGHT BULB REPLACEMENT INSTRUCTIONS

1) Remove screw with a small Phillips screwdriver. Caution: Glass cover may be loose, ensure the cover supported before completely removing the screw.

2) There is a metal clip that clamps onto the glass cover and snaps into the light housing on the screw end. Unsnap the cover by carefully prying apart the metal clip from the light bulb housing. Once unsnapped, slide the cover out and away from the housing and set somewhere safe.

3) Remove old light bulb by pulling the bulb out of the housing (make sure bulb is cool before removal)

4) Using a soft cloth or paper towel, replace new light bulb into the housing (fingerprints left on the bulb may reduce its life). Make sure the metal prongs on the light bulb slip into the openings in the light housing

ANNUAL CLEANING & MAINTENANCE

(1) Keeping outdoor cooking gas appliance area clear and free from combustible materials, gasoline and other flammable vapors and liquids.

(2) Not obstructing the flow of combustion and ventilation air.

(3) Keeping the ventilation opening(s) of the cylinder enclosure free and clear from debris.
Visually checking burner flames including pilot burner flame if provided, with pictorial representations.

CLEANING THE COOKING GRATES:

After cooking, turn control knobs to "OFF" and let grill cool before attempting to clean your cooking grids. Before first use and periodically it is suggested that you wash the cooking grids in a mild soap and warm water solution. You can use a washcloth or a vegetable brush to clean your cooking grids.

CLEANING THE FLAME TAMERS & HEAT SHIELDS

Washing the flame tamers & heat shields after every use is not necessary but periodically it is suggested you wash them in a soap and warm water solution. Use a wire brush to remove stubborn burned on cooking residue. Dry the flame tamers & heat shields thoroughly before you reinstall it in the cooking insert.

CLEANING THE GREASE TRAY

The grease tray should be emptied and wiped down periodically and washed in a mild detergent and warm water solution.

ANNUAL CLEANING OF GRILL HOUSING

Burning-off the grill after every cookout will keep it ready for instant use. However, periodically the grill should be given an entire thorough cleaning to ensure optimal performance.

- 1) Shut off gas supply at source and disconnect fuel line from gas valve manifold. Protect fuel line fitting.
- 2) Remove and clean (as explained above) the cooking grids, flame tamers and burners.
- 3) Remove warming rack and wash with mild detergent and warm water.
- 4) Cover the gas valve orifices with a piece of aluminium foil.
- 5) Brush the inside and bottom of the grill with a stiff wire brush and wash down with a mild soap and warm water solution. Rinse thoroughly and let dry.

IMPORTANT: DO NOT line the bottom of the grill housing with aluminium foil, sand or any other grease absorbent substance. Grease will not be able to drip down into the grease collector and a grease fire could occur. It is that you use Bull Grease Tray Liners for ease clean up and maintenance.

STAINLESS STEEL CLEANING AND MAINTENANCE

Your Grill's outstanding lustre and durability is attributed to Stainless Steel construction. The Stainless Steel has an outer layer that relies on a proper cleaning and maintenance routine as the best way to remain intact and prevent corrosion. Please note, Stainless Steel is not 'rust proof' contrary to popular belief. Grills are at higher risk of corrosion by exposure to chemicals, caustics and fertilizers from swimming pools and outdoor landscaping. Locations with climates with greater heat and humidity will intensify this condition. By following a proper cleaning routine, you will add to the years you enjoy your Bull grill.

CLEANING (CONTINUED)

REQUIRED INSTALLATION, OPERATION AND MAINTENANCE INSTRUCTIONS THAT MUST BE FOLLOWED PER ANSI Z210.58-CSA 1.6-2019 SECTION 4.24.2a FOR ALL OUTDOOR COOKING GAS APPLIANCES.

Installation must conform with local codes or, in the absence of local codes, with either of the following as applicable:

- National Fuel Gas Code, ANSI Z223.1/NFPA 54
 - National Gas and Propane Installation Code, CSA B149.1
 - Propane Storage and Handling Code. CSA B149.2
 - Standard for Recreational Vehicles, ANSI A119.2/NFPA 1192 OR Recreational Vehicle Code, CSA Z240 RV Series
- If an electrical source is utilized, the outdoor cooking gas appliance, when installed must be electrically grounded in accordance with local codes, or in the absence of local codes with the refer to National Electrical Code, ANSI/INFPA 70 or Canadian Electrical Code, Part 1, CSA C22 the following as applicable:
- This outdoor cooking gas appliance shall be used only outdoors and shall not be used in a building, garage or any enclosed area.
 - This outdoor cooking appliance is not intended to be installed in or on boats
 - This outdoor cooking appliance is not intended to be installed in or on recreational vehicles
 - Do not remove any labels, nameplate or data plate that show the manufacturer's, distributor's, jobber or dealer's name, manufacture's address, model name or serial number.
 - **YOUR GRILL'S MINIMUM CLEARANCE FROM THE BACK AND SIDE OF ANY COMBUSTIBLE CONSTRUCTION MUST BE AT 21 INCHES MUST NOT BE UNDER OVERHEAD COMBUSTIBLE CONSTRUCTION.**

REFER TO MANUAL PAGES LISTED BELOW FOR GRILL INSPECTION, MAINTENANCE OR SAFETY GUIDELINES:

PAGE 3-5 INFO AND LOCATIONS FOR ORDERING REPLACEMENT PARTS

PAGE 6

•CHECKING AND CLEANING OF BURNER/VENTURI TUBES OF INSECTS AND INSECT NESTS.

•PAGE 8 OR 17 GAS LEAK TESTING PROCEDURES

•**PAGE 8** LP HOSE INSPECTION PRIOR TO EACH USE. ENCLOSED GRILLS MUST HAVE ACCESS TO INSPECT THE HOSE AND CONNECTIONS. UPON INSPECTION, A HOSE WITH ANY CUTS, SLITS, TEARING, EXCESSIVE ABRASION OR WEAR. **MUST BE REPLACED, DO NOT USE.** REFER TO PAGES 3 & 4 TO ORDER REPLACEMENT LP HOSE.

PAGE 6 AND 20

ROTISSERIE INSTALLATION TO GRILL

A CLOGGED TUBE CAN LEAD TO FIRE BENEATH THE GRILL.

- REQUIRING OUTDOOR GAS APPLIANCE TO BE CLEAR AND FREE OF COMBUSTIBLE MATERIALS, GASOLINE, OR OTHER LIQUIDS EMITTING FLAMMABLE VAPORS.
- DO NOT ALLOW OBSTRUCTION OR RESTRICTION TO THE FLOW OF COMBUSTION AND VENTILATION AIR AROUND GRILL HOUSING.
- KEEPING THE VENTILATION OPENING OF THE CYLINDER ENCLOSURE FREE AND CLEAR FROM DEBRIS.
- KEEPING ELECTRICAL SUPPLY CORD AND FUEL SUPPLY HOSE AWAY FROM ANY HEATED SURFACES.

PAGE 23 BURNER INSPECTION INSTRUCTIONS THAT SHOULD BE DONE MONTHLY.

PAGE 24 IMPORTANTANCE OF BURNER ORIFICES BEING PROPERLY INSERTED INTO THE BURNER TUBES.

If the valve orifices do not fit inside the burner tubes, lighting the burners may cause explosion and/or fire.

PAGE 25 & 26

•CLEANING THE GRILL, INCLUDING SPECIAL SURFACES AND RECOMMENDED CLEANING AGENTS.

NEVER SMOKE DURING TROUBLESHOOTING

TROUBLESHOOTING
IF GRILL FAILS TO OPERATE PROPERLY

/ Turn off gas at source, turn control knobs to “OFF”, and wait five minutes before trying again.

/ Check gas supply/connections.

Repeat lighting procedure. If Grill still fails to operate properly, **TURN “OFF” GAS AT SOURCE, TURN CONTROL KNOBS TO “OFF”**, wait for grill to cool, and check for the following potential causes below and how to address:

MISALIGNMENT OF BURNER TUBE(S) OVER ORIFICE(S) / CORRECTION:

Reposition burner tube to properly seat over orifice.

OBSTRUCTION IN GAS LINE /CORRECTION:

/ Remove fuel line from grill.

/ Open gas supply for one second to blow any obstruction from fuel line.

/ Close off the gas supply at source and reconnect fuel line to grill.

PLUGGED BURNER ORIFICE/ CORRECTION:

To access a Burner Orifice:

/ Start by following the instructions on pages 24 and 25 to allow Burner removal and inspection.

/ Next, carefully lift each burner up and away from the gas valve orifice. Remove the orifice from each burner up and away from gas valve and gently clear any obstruction with a fine wire. **If an obstruction is in the in-gas valve(s) or gas valve bracket, please contact your gas grill dealer or gas appliance service person for assistance.**

/ Re-install the orifice.

/ Per page 26, reinstall burners over orifices and seat each burner peg. Perform Burner ignitor test to confirm it is working.

/ Replace cooking components and grease collectors before attempting to light grill.

MISALIGNMENT OF IGNITER ON BURNER / CORRECTION

/ Check for proper position of electrode tip. The tip of the electrode should be pointing forward toward the front and free from grease where the spark discharges.

/ The ignition wire should be rigidly connected to the valve ignition and electrode.

/ Replace the ignition wire if the wire is broken or cracked. With gas supply closed and all control knobs set to “OFF”, check each positive igniter individually for presence of spark at electrode. In turn, push each control knob fully and rotate about 1/4 turn to the left counterclockwise until click is heard; the trigger hitting the strike block should produce a blue spark at the electrode tip. Return control knob to “OFF” before checking the next igniter.

IF RE-IGNITION IS NECESSARY

While the gas grill is still hot, you must wait for a minimum of five minutes before commencing to re-ignite (this allows accumulated gas fumes to clear). If all checks/corrections have been made and the gas grill still fails to operate properly, consult your grill dealer or gas appliance service person.

FLAME COLOR / CORRECTION

/ Once the entire burner is operating, check the flame color to be sure it is mostly blue (some yellow color will be present because of impurities in the fuel).

/ If the flame is golden or yellow in color the reason could be seasoning salts, oil film, or other foreign matter on burner.

/ Remove burners and use compressed air to blow out residue from the interior of burner.

FLASH BACK When fire occurs in and around the burners, immediately turn off gas at its source and turn the control knob(s) to “OFF” Wait until the grill has cooled, then clean the burners and burner ports as described on page 21.

Warranty Policy

LIMITED WARRANTY ON BULL OUTDOOR PRODUCTS, INC., PRODUCTS

THIS LIMITED RIGHTS, WHICH VARY FROM STATE TO STATE.

THIS LIMITED WARRANTY CAN ALSO BE FOUND ON OUR WEB SITE AT:

<https://www.bullbbq.com/support-warranty> (United States Customers)

<https://bullbbq.eu/customer-care/#warranty-registration-form> (International Customers)

AND IN THE OWNER'S/INSTALLATION MANUAL THAT WE PROVIDE WITH OUR PRODUCT.

THIS LIMITED WARRANTY IS SUBJECT TO THE EXCLUSIONS, CONDITIONS AND LIMITATIONS SET FORTH BELOW.

ANY IMPLIED WARRANTIES IMPOSED BY LAW, INCLUDING WITHOUT LIMITATION THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE LIMITED IN DURATION TO THE DURATION OF THIS EXPRESS LIMITED WARRANTY. SOME STATES DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS, SO THE ABOVE LIMITATION MAY NOT APPLY TO YOU.

WHO MAY USE THIS WARRANTY?

BULL OUTDOOR PRODUCTS, INC. located at address 1011 East Pine St. Lodi, CA. 95240

("we") extend this limited warranty only to the consumer who originally purchased the product ("you") at the original site of delivery or installation. It does not extend to any subsequent owner or other transferee of the product. It does not apply to products installed in any rental, commercial or non-residential application. Examples of excluded applications include, but are not limited to day care centers, schools, bed and breakfast centers, churches, private clubs, fire stations, club houses, common areas in multi-family dwellings, restaurants, hotels, nursing homes, food service locations and institutional food service locations.

WHAT DOES THIS WARRANTY COVER?

This limited warranty covers defects in materials and workmanship of the product and product components identified below for the Warranty Periods defined below.

WHAT IS THE PERIOD OF COVERAGE?

This limited warranty starts on the date of your purchase and lasts for the time period or time periods specified above (the "**Warranty Period**"). The Warranty Period is not extended if we repair or replace the product. We may change the availability of this limited warranty at our discretion, but any changes will not be retroactive.

Warranty Policy (Continued)

Grilling/Pizza Accessories and Grill Covers DO NOT include a warranty period.

Grill Warranty Periods

The following parts are covered for **1 year** on all our current gas grill models:

- The lid, control panel, grease tray, bezels, knobs, temperature gauge, valves, regulator, flex tubes, rotisserie burner, transformer, and all components of the lighting system.

The following parts are covered for **3 years** on all our current gas grill models:

- The manifold, handle end caps, flame tamers, heat shields, and warming rack.

The following parts are covered for the **lifetime** on all our current gas grill models:

- Insert assembly and the grates.

The warranty period for the grill burners varies by type:

- Cast stainless steel burners - **Lifetime**
- Welded stainless steel burners - **5 years**
- Porcelain coated burners - **3 years**

The warranty period for the charcoal grill is **1 year** on all parts, except for the insert assembly, which is covered for **5 years**.

Component Warranty Periods

All the parts for our components /grill carts/refrigerators/kegerators/drawers/doors/refrigerator frames/grill jackets/finishing frames/ice chest/sinks/bar center are covered for **1 year** with these exceptions:

Power Burner

- The insert/grates are **lifetime** covered parts.
- The manifold/burner is covered for **3 years**.

Searing Station/Slide in Double Sideburner

- The grates are covered for **lifetime**,
- The insert for **5 years**, and
- The manifold for **3 years**.

Single Sideburner

- The grates are covered for **5 years** and
- The burner for **3 years**.

Sidekick

- The burner is covered for **3 years**.

Pizza Ovens/Islands/Fire Features Warranty Periods

- All the parts and construction materials are covered for **1 year**.

Warranty Policy (Continued)

WHAT DOES THIS WARRANTY NOT COVER?

This limited warranty does not cover any damage due to:

- Transportation.
- Storage
- Improper installation or use
- Use on improper fuel/gas supply.
- Failure to follow the product instructions or to perform any preventive maintenance.
- Modifications.
- Unauthorized repair.
- Normal wear and tear, rust, corrosion, oxidation, or discoloration.
- External causes such as accidents, abuse, or other actions or events beyond our reasonable control.

WHAT OPTIONS ARE OFFERED BY BULL OUTDOOR PRODUCTS UNDER THIS WARRANTY?

With respect to any defective product claim made during the Warranty Period, we will, in our sole discretion:

- Replace such product (or the defective part) free of charge or refund the purchase price of such product.

WHAT IS EXCLUDED BY BULL OUTDOOR PRODUCTS UNDER THIS WARRANTY?

- We will not pay for shipping charges for repaired or replacement parts, or for any labor or labor related charges.
- We will not pay for any accessory products or ancillary products purchased by you for use in connection with the product.

HOW DO YOU NOTIFY BULL CUSTOMER SERVICE OF A POTENTIAL WARRANTY ISSUE?

Our Customer Service is ready to help. Here's how to reach us:

By Phone (800) 521-2855 Monday through Friday from 8:00 a.m. to 5:00 p.m. (EDT)

To submit a warranty claim on-line or message go to <https://www.bullbbq.com/support-warranty>

LIMITATION OF LIABILITY

THE REMEDIES DESCRIBED ABOVE ARE YOUR SOLE AND EXCLUSIVE REMEDIES AND OUR ENTIRE LIABILITY FOR ANY BREACH OF THIS LIMITED WARRANTY. OUR LIABILITY SHALL UNDER NO CIRCUMSTANCES EXCEED THE ACTUAL AMOUNT PAID BY YOU FOR THE DEFECTIVE PRODUCT, NOR SHALL WE UNDER ANY CIRCUMSTANCES BE LIABLE FOR ANY CONSEQUENTIAL, INCIDENTAL, SPECIAL OR PUNITIVE DAMAGES OR LOSSES, WHETHER DIRECT OR INDIRECT.

SOME STATES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATION OR EXCLUSION MAY NOT APPLY TO YOU.
